

EARLY CAREER SOFTWARE DEVELOPER

EDUCATION

BSc Computer Science, expected 2026

SKILLS

Python, JavaScript, React, SQL, Git

PROJECTS

Built a Flask API for a campus events application.

Added input validation and two unit tests with pytest.

Stored event records in SQLite and documented setup.

Created a React interface for searching campus events.

EXPERIENCE

Presented the project to a class of students.

Worked with two classmates using Git branches.

No Docker, cloud deployment, or RAG project yet.
